**Answer the questions based on the information given below.**

The table given below gives the information about number of people who registered for lucky draw (won + lost) event in four different agencies. Some of the data is given while some are missing.

Agencies	Total number of people who participated in lucky draw contest	Percentage of number of people who won the lucky draw out of total number of people who participated	Ratio of number of males to that of females, who lost lucky draw
A		65%	4:3
B	140		
C	100		3:2
D		90%	

- Question No. 11

If the number of people who lost lucky draw from agency A are 42, then find the total number of people who participated in the lucky draw from agency A.

Options :

1. 120

2. 150

3. 140

4. 130

5. 145

Answer : 120

Direction:

Answer the questions based on the information given below.

The table given below gives the information about number of people who registered for lucky draw (won + lost) event in four different agencies. Some of the data is given while some are missing.

Agencies	Total number of people who participated in lucky draw contest	Percentage of number of people who won the lucky draw out of total number of people who participated	Ratio of number of males to that of females, who lost lucky draw
A		65%	4:3
B	140		
C	100		3:2
D		90%	

• Question No. 12

If the number of people who won from agency B are 8 less than the number of people who participated in agency A and the number of males who lost from agency B are 15, then find the ratio of males to that of females, who lost from agency B given that number of students who lost from agency A are 42.

Options :

1. 5:3
2. 15:11
3. 15:7
4. 15:4
5. 15:13

Answer : 15:13

Direction:

Answer the questions based on the information given below.

The table given below gives the information about number of people who registered for lucky draw (won + lost) event in four different agencies. Some of the data is given while some are missing.

Agencies	Total number of people who participated in lucky draw contest	Percentage of number of people who won the lucky draw out of total number of people who participated	Ratio of number of males to that of females, who lost lucky draw
A		65%	4:3
B	140		
C	100		3:2
D		90%	

- Question No. 13

If the number of males who lost in agency C are 12.5% of the number of people who participated from agency A, then find the percentage of number of people who won in agency C given that number of females who lost in agency A is 18.

Options :

1. 70%
2. 75%
3. 75%
4. 80%
5. 77%

Answer : 75%

Direction:

Answer the questions based on the information given below.

Agencies	Total number of people who participated in lucky draw contest	Percentage of number of people who won the lucky draw out of total number of people who participated	Ratio of number of males to that of females, who lost lucky draw
A		65%	4:3
B	140		
C	100		3:2
D		90%	

• Question No. 14

If total number of people who participated in agency D are 120% more than the number of people who participated in agency C, then find the ratio of number of males to that of females, who lost the lucky draw in agency D, if 14 males lost in agency D.

Options :

1. 3:4

2. 7:8

3. 7:4

4. 7:6

5. 11:4

Answer : 7:4

• Question No. 15

In an election there are a total of 4,000 registered voters out of which  $x\%$  of voters did not cast their votes and 180 votes are declared invalid. The winner got 740 votes more than the losing candidate. The number of valid votes received by the winner are 42% of the total registered voters. How many registered voters did not cast their vote?

**Options :**

1. 1200
2. 1500
3. 1350
4. 1250
5. None of these

Answer : 1200

• Question No. 16

Each of the articles is marked 80% above its cost price and a 30% discount was given on it while selling. The selling price of article A is Rs. 126 less than the selling price of article B. If the MRP of article B is Rs. 1080, then find out the difference between the cost price of article A and B.

**Options :**

1. Rs. 80
2. Rs. 120
3. Rs. 150
4. Rs. 100
5. None of the above

Answer : Rs. 100

• Question No. 17

'A' and 'B' together started a business by investing their capitals in ratio 3:2, respectively. Nine months later, they both invested Rs. 500 more. If at the end of one years, the profit was divided between 'A' and 'B' in the ratio 29:21, respectively, then find the difference between the amounts invested by 'A' and 'B', initially.

**Options :**

1. Rs. 150
2. Rs. 350

- 3. Rs. 200
- 4. Rs. 120
- 5. None of these

Answer : Rs. 200

• Question No. 18

5 positive numbers are written on a piece of paper. Sum of first 3 numbers is 60 and ratio of the 4th and the 5th number is 2:3. If difference between the 4th and the 5th number is 14, then find the average of all the numbers.

**Options :**

- 1. 26
- 2. 20
- 3. 25
- 4. 23
- 5. None of these

Answer : 26

• Question No. 19

Sunil invested Rs. '4x' in scheme 'A' offering simple interest of 25% p.a. and reinvested the interest earned from scheme 'A' at the end of 4 years in scheme 'B' offering compound interest of 20% p.a. compounded annually. If total amount received from scheme 'B' after 2 years is Rs. 4320, then find the value of '12x'.

**Options :**

- 1. 9500
- 2. 9200
- 3. 9000
- 4. 9700
- 5. None of these

Answer : 9000

- Question No. 20

Train 'A' running with a speed of 126 km/hr can cross a standing goods train of 4 times its length in 25 seconds. Find the time taken by 500 metres long train 'B' which is coming from opposite direction of train 'A', with a speed of 10 m/s, to cross train 'A'.

**Options :**

1. 15 seconds
2. 5 seconds
3. 14 seconds
4. 10 seconds
5. None of these

Answer : 15 seconds

- Question No. 21

The speed of current is 29 km/hr. If the speed of the boat in still water had been 17 km/hr more than the original speed then it would take 6.2 hours to cover 310 km in downstream. Find the original speed of the boat in still water (in km/h).

**Options :**

1. 6
2. 7
3. 4
4. 8
5. None of these

Answer : 4

- Question No. 22

$(y+40)$  boys can do a piece of work in  $(z-20)$  days.  $(y-5)$  boys can do the same piece of work in  $(z+20)$  days. If  $(y+30)$  boys can do the same piece of work in  $(z-12)$  days, then find out the value of 'y'.

**Options :**

1. 400
2. 480
3. 320
4. 360
5. None of the above

Answer : 320

• Question No. 23

'A' is 4 years younger than 'B' and 6 years elder than 'C'. If the present age of 'B' and 'D' is 28 years and 20 years, respectively, then find the ratio of present age of 'C' to present age of 'D'.

**Options :**

1. 9:11
2. 9:13
3. 9:10
4. 13:10
5. None of these

Answer : 9:10

• Question No. 24

The ratio of the speed of boats 'A' and 'B' in still water is 8:9, respectively. The speed of the current is 25% of the speed of boat 'A' in still water. If boat 'A' takes 7.5 hours to travel 750 km downstream, then find the time taken by boat 'B' to travel 210 km upstream and 330 km downstream. (Note: Both the boats are rowing in the same stream.)

**Options :**

1. 2 hours
2. 8 hours
3. 6 hours

- 4. 12 hours
- 5. None of these

Answer : 6 hours

• Question No. 25

The average weight of five friends A, B, C, D and E is  $(x+8)$  years while the average weight of C and E is  $(x-8)$  kg. If the weight of another person F is also added, then average weight of all of them is reduced by 7 kg. Find the value of 'x' if average weight of A, B, D and F is 92.5 kg.

**Options :**

- 1. 97 kg
- 2. 87 kg
- 3. 92 kg
- 4. 94 kg
- 5. 89 kg

Answer : 87 kg

**Read the following passage carefully and answer the following questions based on the passage. Some words are highlighted to help you answer a few questions:**

The environment and ecology are intricately linked, forming the very fabric of life on Earth. Ecology is the study of the relationships between organisms and their environment, encompassing the interactions between living organisms and their physical surroundings. It delves into the complex web of interconnectedness, where every organism, from the tiniest microbe to the largest predator, plays a vital role in maintaining the balance of ecosystems.

Our environment, comprising the air we breathe, the water we drink, and the land we inhabit, sustains all life forms. However, human activities have drastically altered this delicate balance, leading to widespread environmental degradation and loss of biodiversity. Deforestation, pollution, climate change, and habitat destruction are just a few of the pressing issues threatening our planet's health.

Addressing these challenges requires a concerted effort from individuals, communities, governments, and businesses worldwide. Conservation initiatives, sustainable practices, and environmental policies are crucial steps

towards safeguarding our planet for future generations. By understanding the principles of ecology and embracing a mindset of stewardship, we can strive to restore harmony between humanity and nature.

Ultimately, the fate of our environment rests in our hands. Through collective action and a commitment to sustainable living, we can forge a path towards a healthier, more resilient planet where both human and ecological communities thrive in harmony.

- Question No. 26

What is the primary focus of ecology?

**Options :**

1. Studying human behavior
2. Analyzing economic systems
3. Understanding the relationships between organisms and their environment
4. Investigating political structures
5. Exploring technological advancements

Answer : Understanding the relationships between organisms and their environment

Introduction: Inference is a conclusion drawn on the basis of knowledge of facts available. In questions on INFERENCES, a paragraph is followed by few Paragraphs. On the basis of the information given in the passage, we have to check the truthfulness or falsity of the given Paragraph. Each Paragraph can be put into one of the four categories.

definitely true

probably true

probably false

definitely false

Directions: In each question below is given a passage followed by some inferences. You have to examine each inference separately in the context of the passage and decide upon the degree of truth or falsity of the inference.

Mark answer

• Question No. 86

**Paragraph:**

Until the 1850's, Herman Melville primarily published novels, including Moby Dick, which would later become one of America's most famous and beloved novels. His novels, however, had extremely low sales, and Melville had to quit writing novels because no publisher would agree to print his books. In an effort to make more money from his writing, Melville chose to publish some poetry instead. Poetry was extremely popular and sold well in 19th-century America, so Melville expected to make a profit from his first book of poems. These poems, however, were as unpopular as his novels, and sold scarcely any copies.

**Inference:**

Had publisher agreed to print Melville's books, Melville would have continued writing the novels.

**Options :**

1. if you think that the answer is definitely true.
2. if you think that the answer is probably true.
3. if the data provided is inadequate to answer the question.
4. if the answer is definitely false.
5. if the answer is probably false.

Answer : if you think that the answer is probably true.

Direction:

4. if the answer is definitely false.
5. if the answer is probably false.

Answer : if the data provided is inadequate to answer the question.

Direction:

**In the question below some statements are given followed by three conclusions I, II, and III. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusion definitely follows from the given statements, disregarding commonly known facts.**

- Question No. 91

Statements:

All Pearl are Flower.

Some Bud are Pearl.

No Flower is a Stem.

Conclusions:

I. Some Bud are Flower is a possibility.

II. Some Pearl are Stem is a possibility.

III. Some Stem are Bud.

**Options :**

1. Only Conclusion I and II follow
2. Only Conclusion II and III follow
3. Only Conclusion III and I follow
4. Only Conclusion III follows
5. None of the Conclusions follows

Answer : None of the Conclusions follows
