**Read the following passage carefully and answer the questions.**

We've heard it all — reduce and reuse, segregate, change your consumption — but nothing forces one to think about it as much as when a daily practice such as waste collection is affected. In order to make the groceries last longer and generate less waste in case collection is disrupted, we've been trying harder to plan each meal better and have no leftovers, but we're still generating more than we could. Even after a carefully planned grocery run, there are too many plastic packets to put into the dry waste bag. And as we try frantically to fast track a switch from disposables to cloth diapers for the 3-month-old infant in the house, the laundry load piles in a newly designated nappy bucket.

COVID-19 has hit all of our lives in myriad and unexpected ways, ranging from loss of jobs and income, to merely battling boredom by doing WhatsApp puzzles. But it has certainly made many the middle class think about things usually **taken for granted**, one of which is what we can do as end-users for our consumption and waste generation.

With overloaded recycling centres and lack of trucks, dry waste too is to be stored until collected, and tips circulate on how to manage this — cutting plastic packets with food on three sides and washing and drying them, putting smaller paper pieces into a bigger bag and securing them to reduce volume, scraping coconut shells clean. When we actually sat with the dry waste and carried out the process of cutting and washing, we were quite amazed at how a two weeks' worth milk packets managed to shrink to the size of a cell phone. And when we replaced the wet waste dustbin with a much smaller container, it helped us to think twice each time we wanted to throw something in.

People are also being urged to switch to green options for sanitary waste like reusable cloth pads or menstrual cups, as there is no clarity on when waste collection could get further disrupted.

There is of course no reason to not uphold these practices year around — many of us fail to do them simply because we have other options. We must have tried several times to make the transition to sustainable sanitary

products, but may have only managed it partially. Many of the storage bottles in the middle-class kitchen are old pickle and jam bottles, but sometimes they resort to buying containers. And there is the inevitable Swiggy order on lazy days, bringing with too many containers, covers, cutlery and napkins.

The lockdown seems to have brought back some of the sustainable practices, if only to avoid unnecessary shopping trips. And in the process make us realise that some changes are more possible than we expected. Now, we don't quite have too much choice. But once this all passes we will. And hopefully, we will still carry over some sustainability habits from these turbulent times.

• Question No. 1

According to the author, when are we forced to think about the words reduce and reuse, segregate, etc.?

**Options :**

1. When there is shortage of food.
2. Only when we are bored, like during lockdowns.
3. When we face difficulty with throwing the waste away.
4. When we want to be creative with scraps
5. None of these

**Answer :** When we face difficulty with throwing the waste away.

**Direction:**

- Question No. 2

In the first paragraph, what are the things that we do to generate less waste?

**Options :**

1. plan each meal in a better way.
2. carefully plan grocery run, so that there would be many plastic packets.
3. switch to more sustainable ways like switching from cloth diapers to disposables

4. Both A and C

5. All of these

Answer : plan each meal in a better way.

**In each of the following giving number series, a wrong number is given. Find out the wrong number?**

- Question No. 25

46, 51, 61, 84, 121, 201

**Options :**

1. 201

2. 51

3. 61

4. 84

5. 121

Answer : 84

- Question No. 26

A trader sells two shirts for Rs. 3200 each, neither losing nor gaining in all. If he sold one of the shirts at a gain of 25%, the other was sold at a loss of

**Options :**

1. 14.28%

2. 16.67%

3. 9.67%

4. 8.33%

5. None of these

Answer : 16.67%

- Question No. 27

The average income of Shivani for the January to Oct is Rs.10400. She got Rs.9500 in January and Rs.8900 in Nov. The average income for the months of February to Nov is:

**Options :**

1. 11400
2. 10340
3. 9500
4. 12050
5. None of these

Answer : 10340

- Question No. 28

A 720 meter long train moving with an average speed of 108 Km/hr crosses a platform in 40 seconds. A man crosses the same platform in 2 minutes. What is the speed of a man in m/sec?

**Options :**

1. 8 m/sec
2. 5 m/sec
3. 4 m/sec
4. 6 m/sec
5. None of these

Answer : 4 m/sec

- Question No. 29

Manan is 6 years older than Jeevan and Lakhan is 4 years younger than Manan. If the average age of Jeevan and Lakhan is 20 years. Find the sum of the age of Lakhan, Jeevan and Manan.

**Options :**

1. 77 years
2. 72.5 years
3. 65 years
4. 82.5 years
5. 62 years

Answer : 65 years

• Question No. 30

A certain sum at simple interest amounts to Rs 40500 in 3 yr and to Rs 46200 in 6 yr. Then the sum is ?

Options :

1. Rs. 46500
2. Rs. 37852
3. Rs. 31520
4. Rs. 45210
5. None of these

Answer : None of these

• Question No. 31

Two partners' prateek and abhishek started a business with the capital of Rs. 66000 and Rs. 44000 respectively. In what ratio the profit will be shared after two years?

Options :

1. 3:2
2. 2:5
3. 4:1
4. 1:7
5. None of these

Answer : 3:2

- Question No. 32

A man can row 12 km/hr in still water. It takes him twice as long to row up as to row down the river. Find the rate of the current.

**Options :**

1. 4 km/hr
2. 5 km/hr
3. 6 km/hr
4. 7 km/hr
5. 12 km/hr

Answer : 4 km/hr

- Question No. 33

In a school there are 50 more girls than boys. If the number of girls is increased by 20% and the number of boys is also increased by 50%, there would be 30 more girls than boys. What is the number of students in the school?

**Options :**

1. 250
2. 280
3. 340
4. 350
5. None of these

Answer : 250

- Question No. 34

A and B can do a piece of work in 15 days, B and C can do it in 20 days, A and C can do it in 30 days. In how many days A, B and C all together will do the same work?

**Options :**

1. 45/6 days
2. 32/5 days
3. 38/4 days
4. 40/3 days
5. None of these

Answer : 40/3 days

• Question No. 35

A car covers 390 km in 3 hours, if due to heavy rainfall speed is decreased by 40%. Find the new distance covered in same time?

Options :

1. 164 km
2. 275 km
3. 288 km
4. 234 km
5. None of these

Answer : 234 km

• Question No. 69

Who sits on the immediate left of N?

**Options :**

1. B's father
2. M
3. Z
4. A
5. B's mother

Answer : B's father

• Question No. 70

How many such pairs of letters are there in the word MISCELLANEOUS each of which has as many letters between them in the word (in both forward and backward directions) as in the English alphabet?

**Options :**

1. One
2. Two
3. Three
4. Four
5. More than four

Answer : Two

Direction:

**Study the information carefully and answer the question that follow-**

There are seven teachers Gagandeep, Ramneet, Vimaljeet, Supreet, Darshdeep, Manpreet and Jagjot taking class on different subjects Maths, English, Zoology, Botany, Physics, Chemistry and SS on different days starting from Monday to Sunday. All the above information is not necessarily in the same order.

Ramneet takes Botany class on Tuesday. There are more than two classes between the classes of Botany and Zoology. Supreet and Gagandeep are not taking either Maths class or SS class. There is a gap of one day between Maths class and SS class. Two persons take class between Manpreet and Supreet. Neither Manpreet nor Supreet takes class on either Sunday or Monday. Number of classes above and below is same for the subjects of English and Chemistry respectively. Jagjot does not take Maths class. Darshdeep and Gagandeep are not taking classes immediately before or immediately after Supreet. Gagandeep and Jagjot are taking class on adjacent days. English class was held on last day.

- Question No. 71

Who took class on Wednesday?

**Options :**

1. Darshdeep
2. Manpreet
3. Supreet
4. Jagjot
5. None of these

Answer : Manpreet

- Question No. 74

If all the persons are arranged in the alphabetical order as per their names from Monday to Sunday, then who took class of physics?

**Options :**

1. Manpreet

- 2. Ramneet
- 3. Jagjot
- 4. Gagandeep
- 5. None of these

Answer : Manpreet

• Question No. 75

When the digits, which are odd in the number '81465324' are decreased by 1 and the remaining digits are increased by 1, then what is the sum of 4<sup>th</sup> digit from the right end and 3<sup>rd</sup> digit from the left end of the new number arranged?

Options :

- 1. 12
- 2. 10
- 3. 9
- 4. 8
- 5. 21

Answer : 9

• Question No. 76

In a row of all facing the north, Madhu is Thirteenth from the left end and Seema is fifteenth from the right end. Rakesh, who is second to the right of Madhu, is fifth to the left of Seema in the row. How many persons are there in the row?

Options :

- 1. 34
- 2. 32
- 3. 33
- 4. 40
- 5. None of these

Answer : 34

• Question No. 77

In which direction is point N with respect to point V?

**Options :**

1. Southeast
2. Southwest
3. Northwest
4. South
5. North

Answer : South

Direction:

**Read the given information to answer the given questions.**

Renuka starts walking towards north from Point S. she walks for a distance of 6m and reaches Point T. From Point T she further walks for 10 m to reach Point U. From Point U she turns to her right. After turning right, she walks for 18 m to reach Point V. From Point V she finally turns to her right. She walks for a distance of 12 m and stops at point W. Shan is standing at point W. He walks 10 m towards south to reach N. From point N he takes a right turn. He walks for a distance of 18 m and reaches Point M. From point M he turns to his left. He further walks for a distance of 16 m and stops at point L.

• Question No. 78

What is the distance between Point L and Point S?

**Options :**

1. 22 m
2. 12 m

3. 21 m

4. 14 m

5. 19 m

Answer : 22 m

Direction:

**In each of the questions below are given three statements followed by three conclusions numbered I, II and III. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of given conclusions logically follows from the given statements disregarding commonly known facts.**

• Question No. 79

**Statement:**

Only a few perfects are doctors.

No doctors are experts.

Only masters are experts.

**Conclusion:**

I. Some doctors are perfects.

II. All perfects being doctors is a possibility.

III. All doctors being perfects is a possibility.

**Options :**

1. Only iii follows
2. Either ii or iii and i follow
3. None follows
4. Only i and iii follow
5. None of these

Answer : Only i and iii follow

Direction:
