Answer : Both B & C

Direction:

In the following sentence, a part of the sentence is highlighted in bold. Below it, some options are suggested which may improve the highlighted part of the sentence, to make it meaningful and grammatically correct. Choose which of the following option(s) can successfully replace the highlighted part to make the sentence meaningful and grammatically correct. If the sentence is grammatically correct and requires no improvement, choose option 5), i.e. No improvement required.

- Question No. 62

The provisional estimate of GDP for the second quarter of the fiscal has confirmed that the economy **is in recession for** the first time since Independence.

A. was in recession for

B. is in recession on

C. is on recession for

Options :

- 1. Both B & C
- 2. Both A & C
- 3. Only A
- 4. Only B
- 5. No improvement required

Answer : No improvement required

Read the following passage and answer the questions below. Certain words are highlighted to help you in answering questions.

In recent years, the world has witnessed a remarkable surge in technological innovation, particularly in the field of robotics. Robots, once relegated to the realm of science fiction, have transcended their fictional origins and

become integral to various facets of our lives. These advancements are not just limited to the realm of automation but extend to a broader spectrum of applications, revolutionizing industries, healthcare, and our daily routines.

One of the most notable advancements in robotics is the development of humanoid robots. These robots, designed to mimic the physical attributes and movements of humans, hold immense promise in fields such as healthcare and caregiving. They are being deployed in hospitals to assist with patient care, offering a helping hand to nurses and doctors. These robots can perform tasks like delivering medication, monitoring vital signs, and even providing companionship to patients, thus relieving healthcare professionals of some of their burdens and ensuring better patient outcomes.

In manufacturing, robots have evolved beyond the traditional robotic arms on factory floors. Collaborative robots, or "cobots," work alongside humans, enhancing efficiency and safety. They are equipped with advanced sensors and machine learning algorithms, enabling them to adapt to different tasks and even learn from human colleagues. This **synergy** between human workers and robots is redefining how industries approach automation, resulting in higher productivity and job satisfaction.

Autonomous robots, equipped with artificial intelligence and machine learning capabilities, are making **strides** in various fields. From self-driving cars that promise safer and more efficient transportation to drones that monitor and maintain infrastructure, these robots are poised to reshape our world. In agriculture, robotic systems are helping farmers increase crop yields and reduce waste through precision farming techniques, while in logistics, they're streamlining supply chains and ensuring timely deliveries.

Advancements in robotics are not without challenges, though. Ethical considerations, data privacy, and the potential impact on employment are critical issues that need careful attention. Striking the right balance between harnessing the benefits of robotic technology and addressing these concerns will be essential as we move forward.

In conclusion, the rapid advancements in robotics are ushering in a new era of possibilities. With the continued development of humanoid robots, collaborative robots, and autonomous systems, we can anticipate a future where robots are not just tools but active partners in various aspects of our lives, offering innovative solutions to complex challenges and shaping the way we live and work. It is an exciting time, and our ability to harness these advancements responsibly will determine the extent of their positive impact on society.

- Question No. 63

What is one of the primary advantages of using humanoid robots in healthcare, as mentioned in the passage?

Options :

1. They can perform highly complex medical procedures.
2. They are less expensive than traditional medical equipment.
3. They can provide companionship to patients.
4. They require constant supervision from healthcare professionals.
5. They are currently only used in manufacturing.

Answer : They can provide companionship to patients.

• Question No. 64

What is true about the humanoid robots as per the passage?

- i. Humanoid robots have not been trusted enough to act as care providers.
- ii. Humanoid robots have limited physical movements that cannot compete with human's movements.
- iii. Humanoid robots have been proved to be complex, though, ingenious when involved in healthcare service.
- iv. Humanoid robots have the prospect to replace the human healthcare professionals in near future.
- v. Humanoid robots can perform certain tasks like delivering medication, monitoring vital signs, and even providing companionship to patients in healthcare sector.

Options :

- 1. Only I, ii & iii
- 2. Only i & ii
- 3. Only iii
- 4. Only v
- 5. All are true

Answer : Only v

• Question No. 65

What role does collaborative robots, or "cobots," play in industries, according to the passage?

Options :

1. They replace human workers entirely, leading to job loss.
2. They work independently without any need for human interaction.
3. They enhance efficiency and safety by working alongside humans.
4. They are primarily used in agriculture for crop harvesting.
5. They are not equipped with advanced sensors or machine learning algorithms.

Answer : They enhance efficiency and safety by working alongside humans.

"rebound witnessed previous exchange" is coded as "A%7 O&14 A\$5 O%21"

"global strong volatility weighed" is coded as "U*26 I*13 E!7 A&22"

- Question No. 81

What can be the possible code for "succeeded seemingly failed"?

Options :

1. I!27 O%24 U*16
2. E%11 U&6 I&14
3. A\$22 E\$15 A*22
4. CND
5. None of these

Answer : A\$22 E\$15 A*22

Direction:

Study the following information carefully and answer the following questions.

In a certain code,

"slumped initial trading against" is coded as "E&14 A&5 U&1 E&19"

"currency importers demand previous" is coded as "A\$18 U*14 O%21 A%3"

"rebound witnessed previous exchange" is coded as "A%7 O&14 A\$5 O%21"

"global strong volatility weighed" is coded as "U*26 I*13 E!7 A&22"

• Question No. 82

What may be the code for the word "information"?

Options :

1. U#34
2. E\$23
3. O%11
4. I@12
5. None of these

Answer : I@12

Direction:

Study the following information carefully and answer the following questions.

In a certain code,

"slumped initial trading against" is coded as "E&14 A&5 U&1 E&19"

"currency importers demand previous" is coded as "A\$18 U*14 O%21 A%3"

"rebound witnessed previous exchange" is coded as "A%7 O&14 A\$5 O%21"

"global strong volatility weighed" is coded as "U*26 I*13 E!7 A&22"

• Question No. 83

What will be the possible word for the given code "A\$22"?

Options :

1. other
2. single
3. defeat
4. countries
5. None of these

Answer : countries

Direction:

Study the following information carefully and answer the questions below-:

Point A is 26m West of point B. Point C is 52m north of point A. Point D is 39m east of point C and point M is 13m south of point C. point N is 39m north of point B.

- Question No. 84

What is the shortest distance between point M and point N?

Options :

1. 12m
2. 26m
3. 39m
4. 52m
5. 25m

Answer : 26m

Direction:

Study the following information carefully and answer the questions below-:

Point A is 26m West of point B. Point C is 52m north of point A. Point D is 39m east of point C and point M is 13m south of point C. point N is 39m north of point B.

- Question No. 85

In which direction point A with respect to point D?

Options :

1. South east
2. South
3. North east
4. East
5. None of these

Answer : None of these

• Question No. 86

Documents converted to can be published to the Web.

Options :

1. .doc file
2. http
3. machine language
4. HTML
5. None of these

Answer : HTML

• Question No. 87
