**Read the following passage and answer the following questions. Some words are highlighted to help you answer some of the questions.**

If you're like most people, calling an insurance company isn't among your favorite activities. That's because the insurance industry is one of the least innovative areas for customer experience, meaning that customers typically come away from their interactions disappointed and dissatisfied. However, things are definitely changing, and artificial intelligence is playing a large role. The fast-growing technology has the potential to disrupt the entire industry and greatly improve the insurance customer experience. The insurance agency is notorious for its outdated processes. Filing a claim often looks the same today as it did decades ago because the industry isn't consistently leveraging new technologies that are available to them. If an employee is busy or on vacation, a claims request could sit still until the right person is back. The outdated processes make it harder for agents by increasing the workload and forcing them to work with antiquated systems and frustrated customers. However, AI can be applied to improve the claims process. Claims currently are touched by multiple employees. However, a new process of "touch less" claims is introduced in the industry. This process uses artificial intelligence and other technology to report the claim, capture damage, audit the system, and communicate with the customer. The potential here is huge, as the process could allow clients the chance to file claims without having to wade through red tape.

Companies that have already automated some aspects of their claims process have seen a significant reduction in processing times and quality.AI-powered claims could also fight against one of the most costly elements of the insurance industry: fraudulent claims, which cost the industry more than $40 billion a year. Instead of relying on humans to manually comb through reports to catch inaccurate claims, AI algorithms can identify patterns in the data and recognize when something is fraudulent. The industry is definitely ripe for AI disruption. Customers expect to be able to interact with companies through modern technology; a recent survey found that 74% of consumers say they would be happy to get computer-generated insurance advice. Many insurance companies are already using artificial intelligence to some degree, and the number of companies following in their footsteps is sure to increase dramatically over the coming years.

Artificial Intelligence has never been less expensive or more accessible, which means most companies don't have a reason not to adopt it in at least some form. Chatbots work through messaging apps many customers already have on their phones, which makes them a natural next step in customer interaction. In order to truly be effective, chatbots must have natural language processing and sentiment analysis so they can understand what customers are really asking. Effective chatbots can process concerns that are either typed or spoken from customers and provide personalized service.

In the insurance space, chatbots can be used to answer basic questions and resolve claims, as well as sell products, address leads, or make sure customers are properly covered by their insurance. Insurance is a competitive market, so a strong marketing strategy is vital. Traditionally, insurance companies used blanket methods like cold calling customers, but today's customers expect personalized sales tactics. AI can pull in customer data to create a full profile that can be used to offer only relevant insurance products and remember a customer's preferences. Instead of spending valuable time and money on the underwriting process, which typically includes invasive questions and surveys about to dictate premiums, Artificial Intelligence could automate the entire process. Bots could potentially scan a customer's social profile to gather information and find trends and patterns. For example, someone who has a healthy lifestyle and a steady job may be able to be connected to being a safer driver, which could lower insurance premiums. AI can analyze data better than humans to more accurately predict each customer's risk, thereby providing customers with the right amount of insurance and companies with protection from risky customers.

- Question No. 1

Out of the following options which best explain the reason for customers to avoid interaction with insurance companies?

**Options :**

1. Lack of modern technology.

2. Invasion through plethora of questions and surveys.

3. Busy schedules of customers

4. Both (1) and (2)

5. None of these.

Answer : Invasion through plethora of questions and surveys.

- Question No. 13

**Fill in the blanks with the appropriate words to make a grammatically correct and contextually meaningful sentence. Insuring body parts has a surprisingly exotic connotation, despite the morbid subject matter.**

There are various insurance schemes _____(13)_____ property, life, health and automobiles, but until recently, nobody would have thought of having separate body parts insured. Now it is possible to have their body parts insured with an insurance company. If you are a Footballer, you can insure your legs as this body part is _____(14)_____ you to earn your bread and butter. This policy is usually taken by celebrities all over the world as they can afford the high expenses associated with it. Body part insurance is part of Specialty insurance which has already gained a good market abroad. Body part Insurance is usually taken and issued to celebrities who stand to lose from damage or injury to their body part and this policy _____(15)_____ the business loss to a celebrity for that part of their body or talent that is important for their business. It is still possible to put a price on body parts under general insurance policies. The payout from dismemberment tends to depend on how critical that individual part is to your ability to function as this relates to the level of _____(16)_____. These celebrities can afford to pay

the _____(17)_____ insurance premiums on these kinds of policies because they are wealthy and the insured body parts are essential to their work. These stars claim that the loss of use of these body parts would mean that they would no longer be able to generate an income. Essentially this would be the same as a driver losing his eyesight or a programmer losing the use of her hands.

**Options :**

1. Ranging

2. Excluding

3. Covering

4. Governing

5. None of these

Answer : Covering

- Question No. 14

**Fill in the blanks with the appropriate words to make a grammatically correct and contextually meaningful sentence. Insuring body parts has a surprisingly exotic connotation, despite the morbid subject matter.**

There are various insurance schemes _____(13)_____ property, life, health and automobiles, but until recently, nobody would have thought of having separate body parts insured. Now it is possible to have their body parts insured with an insurance company. If you are a Footballer, you can insure your legs as this body part is _____(14)_____ you to earn your bread and butter. This policy is usually taken by celebrities all over the world as they can afford the high expenses associated with it. Body part insurance is part of Specialty insurance which has already gained a good market abroad. Body part Insurance is usually taken and issued to celebrities who stand to lose from damage or injury to their body part and this policy _____(15)_____ the business loss to a celebrity for that part of their body or talent that is important for their business. It is still possible to put a price on body parts under general insurance policies. The payout from dismemberment tends to depend on how critical that individual part is to your ability to function as this relates to the level of _____(16)_____. These celebrities can afford to pay the _____(17)_____ insurance premiums on these kinds of policies because they are wealthy and the insured body parts are essential to their work. These stars claim that the loss of use of these body parts would mean that they would no longer be able to generate an income. Essentially this would be the same as a driver losing his eyesight or a programmer losing the use of her hands.

**Options :**

1. Serviced

2. Aiding

3. Yearning

4. Abiding

5. None of these.

Answer : Aiding

- Question No. 15

**Fill in the blanks with the appropriate words to make a grammatically correct and contextually meaningful sentence. Insuring body parts has a surprisingly exotic connotation, despite the morbid subject matter.**

- Question No. 36

  If on Sunday, he covers 11/9 of distance which was covered by him on Thursday so find the distance covered by him on Sunday.

  **Options :**

  1. 174km
  2. 179km
  3. 186km
  4. 176km
  5. 177km

  Answer : 176km

- Question No. 37

  A invests Rs.2000 in a business while B invests Rs.500 more than A. After 8 months, C joins with Rs.1500. If C gets a profit of Rs.350 in annual profit, then the total profit (in Rs.) is

  **Options :**

  1. 3400

2. 3500

3. 3600

4. 3700

5. 3800

Answer : 3500

- Question No. 38

If a person invests Rs.4000 at 7% per annum for 3 years at SI and he also invests Rs.(x+4000) at CI @ 20% p.a. for 2

years. If he gets Rs.3260 as total interest from both. Find the value of x in Rupees.

**Options :**

1. 1000

2. 2000

3. 3000

4. 1500

5. None of these

Answer : 1500

- Question No. 39

The marked price of an article is Rs.1800 and he sold it at Rs.1080 after giving two successive discounts of X% and

25%. If He sells at a profit of X % after giving the same two successive discounts. What will be cost price of that

article in Rs.

**Options :**

1. 900

2. 850

3. 700

4. 870

5. None of these

Answer : 900

- Question No. 40

Length of a rectangle(R) is 1.25 times of breadth of R. If area of R is 1280 cm$^2$. If breadth of R is base of an equilateral triangle, find the perimeter of that triangle.

**Options :**

    1. 90cm

    2. 93 cm

    3. 96 cm

    4. 99 cm

    5. None of these

Answer : 96 cm

Direction:

Study the following table and answer the questions based on that carefully.

  **Options :**

    1. x > y
    2. x < y
    3. x ≥ y
    4. x = y or no relation between x and y
    5. x ≤ y

  Answer : x = y or no relation between x and y

  Direction:
  **In the following questions, two equations numbered I and II are given.**

  **You have to solve both the equations and give answer.**

**(1) If x > y**

**(2) If x**

**(3) If x ? y**

**(4) If x ? y**

**(5) If x = y or Relationship between x & y cannot be established**

- Question No. 53

I. $x^2 - 8x - 20 = 0$

II. $y^2 + 7y - 18 = 0$

**Options :**

1. x > y

2. x < y

3. x ≥ y

4. x = y or no relation between x and y

5.

Answer : x = y or no relation between x and y

Direction:
**In the following questions, two equations numbered I and II are given.**

**You have to solve both the equations and give answer.**

**(1) If x > y**

**(2) If x**

**(3) If x ? y**

**(4) If x ? y**

**(5) If x = y or Relationship between x & y cannot be established**

- Question No. 54

I. $x^2 - 9x + 20 = 0$

II. $y^3 = 125$

**Options :**

1. x > y

2. x < y

3. x ≥ y

4. x ≤ y

5.

Answer : x ≤ y

Direction:
**In the following questions, two equations numbered I and II are given.**

**You have to solve both the equations and give answer.**

**(1) If x > y**

**(2) If x**

**(3) If x ? y**

**(4) If x ? y**

**(5) If x = y or Relationship between x & y cannot be established**

- Question No. 55

I. 13/x +4 = 4/x +10

II.  $y^2 = 2$ `1/4`

**Options :**

1. x > y

2. x < y

3. x ≥ y

4. x ≤ y

5.

Answer : x ≥ y

- Question No. 56

A can do 2/3 of a work in 8 days. B does the remaining job. Work is done in total 14 days. What is difference of time of A alone & time of B alone to do whole work?

**Options :**

1. 2 days

2. 4 days

3. 6 days

4. 8 days

5. None of these

Answer : 6 days

- Question No. 57

Boat A can cover 75km distance in 5 hours in upstream, speed of boat A in still water is 6 times speed of stream. Speed of boat B in still water is same as that of boat A in downstream then find the speed of boat B in still water.

**Options :**

1. 18 kmph

2. 12 kmph

3. 21 kmph

4. 15 kmph

5. None of these

Answer : 21 kmph

- Question No. 58

5 years hence, the average of ages of A & B will be 40 years. 3 years ago, B was 26 years old. If C is 4 years older than A. find the sum of ages of A & C.

**Options :**

1. 82 years

2. 83 years

3. 84 years

4. 85 years

5. None of these

Answer : None of these

- Question No. 59

If length of a train A is twice of length of train B. If both crosses each other in opposite direction in 10 seconds. If speed of train A & train B be 30kmph & 24kmph. What is the length of train A?

**Options :**

1. 100 m

2. 150 m

3. 120 m

4. 100 m

5. None of these

Answer : 100 m

- Question No. 60

If price of rice is increased by 25% then by what% consumption must be reduced so that expense will remain same?

**Options :**

1. 25%

2. 20%

3. 16.66%

4. 12%

5. None of these

Answer : 20%

Direction:

In a school, all 170 students play at least one sports out of Tennis, Football & Cricket. 5 students play all three games. The number of students who play Tennis & Football both but not Cricket is twice of number of students who play Football & Cricket both but not Tennis. The number of student who play Football is 75. The number of students who play Cricket & Tennis both are 20. The number of students who play only Football is 40. The number of students who play only Cricket is 40% less than number of students who play only Tennis.

- Question No. 61

Find number of students who play exactly 2 sports?

**Options :**

    1. 40

    2. 45

    3. 35

    4. 30

    5. None of these

Answer : 45

Direction:

- Question No. 65

The number of students who play exactly 2 sports is what % of the number of students who play only 1 sports?

**Options :**

1. 38

2. 37.5

3. 38

4. 40

5. None of these

Answer : 37.5

Direction:
**Study the following information carefully and answer the questions below:**

Six Teacher i.e. P, Q, T, R, Sand U attends seminar on two different dates 15th and 28th of three given months viz. January, April and July. They all attend the seminar of different subject i.e. Physics, Economics, History, Chemistry, Biology and Geography, but not necessarily in the same order. T attends the seminar in the month having 30 days.

Only one person attends the seminar between T and the one who attends seminar of Geography. Only three teachers attend the seminar between History and Geography. Number of persons attending the seminar before Q is same as the number of persons attending the seminar after the one who attend seminar of History. Only two person attends the seminar between Q and the one who attend the seminar of Physics. R attends the seminar of Biology. U attends the seminar immediately after S. S does not attend the seminar in the month having less than 31 days. Q and P does not attends the seminar of Economics and Geography.

- Question No. 66

Who among the following teacher attends the seminar on 15th of April?

**Options :**

1. Q
2. U
3. S
4. T
5. None of these

Answer : U

Direction:

  Which of the following teacher's pair attends seminar on the same month?

  **Options :**

  1. S and U
  2. P and U
  3. U and R
  4. T and P
  5. Q and S

  Answer : Q and S

- Question No. 71

  How many such digits are there in the number '6384257' in which the digits are same as in the number series both from backward and forward?

  **Options :**

  1. None
  2. One
  3. Two
  4. Three
  5. More than three

  Answer : More than three

- Question No. 72

Four of the following given five follows a certain pattern find the one that does not belong to that group?

**Options :**

1. ECA

2. QOM

3. GEC

4. FBD

5. MKI

Answer : FBD

Direction:
**Study the following information carefully and answer the questions given below:**

Point A is 20m east of B. Point D is 15m west of point C. Point E is 45m south of point D. Point C is 30 m north of point B. Point F is 15m north of point A. G is the midpoint of point B and point C.

- Question No. 73

If H is the 15m south of point D, then what is the distance between point E and point H?

**Options :**

1. 20m

2. 25m

3. 30m

4. 45m

5. None of these

Answer : 30m
