Read the passage and answer the questions that follow.

Once in a village, there were two best friends, they spend most of the time resting under a tree and thinking about what should they do in their life. In thinking they had already lost a lot of their precious time. So, one day they noticed that the women in the village used to bring water pots from the river which was far away. Even though they make many rounds, the water was never enough for their daily needs. Now, they had an idea. They went to the village and offered them that they would bring water pots on behalf of them and in return charge 25 cents per pot. Everyone liked the offer and their business **grows** too fast. They started to make 50 to 100 rounds daily. Thus, after 10 years, they were the richest men in all the close villages.

But then, one of the friends realized that they need to do something. Now, they are healthy and young but they will not stay this way forever. But the other said that they were fine. The former still wanted to find an alternative. Some days later, in a neighbouring village, he saw a potter making pots and noticed a pot with a long narrow neck. He thought of making a large long pipe of clay and bringing it to the village. The other friend said it was never going to work. This friend had thousands of reasons why that was not going to work but the first one had only one that he wanted to try it.

The construction began. True, a lot of problems came in the way. The pipe broke many a time and many other **hindrances** came too. But finally after 6 to 7 months later, the pipe was all in the place and the water starts to flow in the village. Now, he offered a thousand Pots per day, thus **decreased** the rate to 10 cents per pot. Income started to flow in the first friend's pocket and the second was jobless. Who wants pots for 25 cents if they can have it for 10 cents?

- Question No. 21

On what did the two friends spend their time thinking, when they were resting under the tree?

Options :

1. What they could do to help the villagers.
2. How to make a long pipe.
3. How to make a big profit by selling water.
4. How to make money by sitting under a tree.
5. What they should do in their lives.

Answer : What they should do in their lives.

The construction began. True, a lot of problems came in the way. The pipe broke many a time and many other **hindrances** came too. But finally after 6 to 7 months later, the pipe was all in the place and the water starts to flow in the village. Now, he offered a thousand Pots per day, thus **decreased** the rate to 10 cents per pot. Income started to flow in the first friend's pocket and the second was jobless. Who wants pots for 25 cents if they can have it for 10 cents?

• Question No. 28

Which of the following is a near antonym of the word 'grow'?

Options :

1. seek
2. spill
3. shrink
4. shiver
5. scare

Answer : shrink

Direction:

Read the passage and answer the questions that follow.

Once in a village, there were two best friends, they spend most of the time resting under a tree and thinking about what should they do in their life. In thinking they had already lost a lot of their precious time. So, one day they noticed that the women in the village used to bring water pots from the river which was far away. Even though they make many rounds, the water was never enough for their daily needs. Now, they had an idea. They went to the village and offered them that they would bring water pots on behalf of them and in return charge 25 cents per pot. Everyone liked the offer and their business **grows** too fast. They started to make 50 to 100 rounds daily. Thus,

after 10 years, they were the richest men in all the close villages.

But then, one of the friends realized that they need to do something. Now, they are healthy and young but they will not stay this way forever. But the other said that they were fine. The former still wanted to find an alternative. Some days later, in a neighbouring village, he saw a potter making pots and noticed a pot with a long narrow neck. He thought of making a large long pipe of clay and bringing it to the village. The other friend said it was never going to work. This friend had thousands of reasons why that was not going to work but the first one had only one that he wanted to try it.

The construction began. True, a lot of problems came in the way. The pipe broke many a time and many other **hindrances** came too. But finally after 6 to 7 months later, the pipe was all in the place and the water starts to flow in the village. • Question No. 53

If 60% of total employees in department B in 2016 are male and 40% of total employees in department A in 2018 are female, then find the ratio of total number of females in department B in 2016 to total number of males in department A in 2018.

Options :

1. 5:8
2. 5:7
3. 5:11
4. 5:9
5. 9:5

Answer : 5:9

• Question No. 54

On selling 21 bottles at Rs. 1620, there is a profit equal to the cost price of 6 bottles. The cost price of a bottle is

Options :

1. Rs. 45

- 2. Rs. 50
- 3. Rs. 55
- 4. Rs. 60
- 5. Rs. 108

Answer : Rs. 60

- Question No. 55

Simple interest on a certain sum at the rate of $(50/3)\%$ per annum for three years is Rs. 1250. Find the sum.

Options :

- 1. Rs. 3000
- 2. Rs. 2500
- 3. Rs. 2400
- 4. Rs. 4000
- 5. Rs. 5000

Answer : Rs. 2500

- Question No. 56

In a school there are 60% boys and rest are girls. If number of girls is 360 then find the total number of boys in the school.

Options :

- 1. 540
- 2. 600
- 3. 900
- 4. 640
- 5. 480

Answer : 540

- Question No. 57

Ten years ago, the average age of five employees was 35 years. The present average age is 45 years after the inclusion of two new employees. Find the present average age of two new employees.

Options :

1. 48 years
2. 45 years
3. 65 years
4. 60 years
5. 50 years

Answer : 45 years

- Question No. 58

If an article is sold at 25% discount at mark-price then loss percent is 10%. If the article is sold at marked price then what will be profit or loss percent?

Options :

1. 50%
2. 40%
3. 30%
4. 20%
5. 25%

Answer : 20%

- Question No. 59

Sumit can swim 12 km upstream and 16 km downstream in 5 hours. If ratio of speed of stream to that of speed of Sumit in upstream is 1:2, then find the speed of Sumit in still water.

Options :

1. 6 km/hr
2. 5 km/hr
3. 4 km/hr
4. 8 km/hr
5. 7 km/hr

Answer : 6 km/hr

• Question No. 60

A question is given to Saket, Ankush and Prem. Probability that Saket, Ankush and Prem can solve the question is $\frac{1}{3}$, $\frac{2}{5}$ and $\frac{1}{2}$. Find the probability that the question will be solved.

Options :

1. $\frac{3}{5}$
2. $\frac{1}{5}$
3. $\frac{2}{5}$
4. $\frac{4}{5}$
5. $\frac{1}{3}$

Answer : $\frac{4}{5}$

• Question No. 61

A gardener uses cylindrical roller of diameter 7 cm and length 28 cm to flatten a rectangular field of dimension 280cm × 165 cm. Find the number of revolutions made by the roller to flatten the entire field?

Options :

1. 225
2. 125
3. 75
4. 150
5. 95

Answer : 75

- Question No. 62

Vessels A and B contain mixture of milk and water in the ratios 3:7 and 5:3 respectively. In what ratio should quantities of mixtures be taken from A and B to form a mixture in which milk to water is in the ratio 4:5?

Options :

1. 2:5
2. 4:3
3. 5:4
4. 2:3
5. 3:4

Answer : 5:4

- Question No. 63

Ramesh, Rajan and Ritesh enter into partnership by making investments in the ratio 3 : 5 : 7. After a year, Ritesh invests another Rs. 337600 while Ramesh withdraws Rs. 45600. The ratio of investments then changes to 24:59:167. How much did Ramesh invest initially?

Options :

1. Rs. 45600
2. Rs. 141600
3. Rs. 96000
4. Rs. 156000
5. None of these

Answer : Rs. 141600

- Question No. 64

A pump can fill a tank with water in 2 hours. Because of a leak in the tank it was taking $7/3$ hours to fill the tank. The leak can drain all the water off the tank in:

Options :

1. 8 hours
2. 7 hours
3. $13/3$ hours
4. 14 hours
5. None of these

Answer : 14 hours

• Question No. 65

A and B working together, can do a piece of work in $4\frac{1}{2}$ hours. B and C working together can do it in 3 hours. C and A working together can do it in $2\frac{1}{4}$ hours. All of them begin the work at the same time. Find how much time they will take to finish the piece of work?

Options :

1. 3 hours
2. 2 hours
3. 2.5 hours
4. 1 hour
5. None of these

Answer : 2 hours

'country becomes necessary' is written as 'lax acv dfg',

'country way wake increasing inflation' is written as 'oqs prf rsn acv tpl',

'in becomes way wake the' is written as 'tpl dfg rsn gex hga'

'unemployment way inflation' is written as 'rtd tpl prf'.

• Question No. 75

'tpl oqs prf' is the code for?

Options :

1. wake way inflation
2. unemployment way inflation
3. way increasing inflation
4. Can't be determined
5. None of these

Answer : way increasing inflation

Direction:

Study the following information to answer the given questions.

There are seven members of a family of three generations and two are married couples. A is the father-in-law of E. C is the only son of B. There are two children of D, who is married to brother-in-law of C. F is not the son of E. G is the grandson of the husband of B.

• Question No. 76

Who is the maternal grandmother of F?

Options :

1. Wife of A
2. D

- 3. C
- 4. G
- 5. Mother of G

Answer : Wife of A

Direction:

Study the following information to answer the given questions.

There are seven members of a family of three generations and two are married couples. A is the father-in-law of E. C is the only son of B. There are two children of D, who is married to brother-in-law of C. F is not the son of E. G is the grandson of the husband of B.

• Question No. 77

Who is the daughter of Husband of B?

Options :

- 1. C
- 2. E
- 3. G
- 4. D
- 5. F

Answer : D

• Question No. 78

How many pairs of letters are there in the word "CLOTHING" each of which have as many letters between them in the word as they have between them in the English alphabetical series?

Options :

- 1. Five
- 2. Three
- 3. Two

- 4. Four
- 5. More than five

Answer : Two

Direction:

Study the given information and answer the following question.

A person starts walking in east direction from point P, after walking 15 m he reached at point Q, then he takes left turn and walks some distance to reach at point S. From point S he walks in north direction and walks 10 m to reach at point T. Point R is 12 m west of point S. Distance between point T and S is half of distance between Point S and Q.

- Question No. 79

What is the shortest distance between point P and point S?

Options :

- 1. 25 m
- 2. 12 m
- 3. 20 m
- 4. 14 m
- 5. None of these

Answer : 25 m

Direction:

Study the given information and answer the following question.

A person starts walking in east direction from point P, after walking 15 m he reached at point Q, then he takes left turn and walks some distance to reach at point S. From point S he walks in north direction and walks 10 m to reach at point T. Point R is 12 m west of point S. Distance between point T and S is half of distance between Point S and Q.

- Question No. 80

What is the direction of point T with respect to R?

Options :

1. North
2. North-east
3. South-west
4. South-east
5. None of these

Answer : North-east

Direction:

In these questions, a relationship between different elements is shown in the statements. The statements are followed by two conclusions. Give answer

• Question No. 81

Statement: $G \geq V \geq S$, $G \leq Y \leq I$, $Q < O \leq G$, $I \geq N < Z$

Conclusion: I. $S < Z$ II. $Q > N$

Options :

1. If only conclusion II is true.
2. If only conclusion I is true.
3. If neither conclusion I nor II is true
4. If either conclusion I or II is true.
5. If both conclusions I and II are true.

Answer : If neither conclusion I nor II is true

Direction:

In these questions, a relationship between different elements is shown in the statements. The statements are followed by two conclusions. Give answer

• Question No. 82

Statement: $E \leq B \leq N < T$, $A < V \leq E$, $R > B \leq Z < H$

Conclusion: I. $A < Z$ II. $T > R$

Options :

1. If both conclusion I and II are true.
2. If only conclusion I is true.
3. If neither conclusion I nor II is true.
4. If either conclusion I or II is true.
5. If only conclusion II is true.

Answer : If only conclusion I is true.

Direction:

In these questions, a relationship between different elements is shown in the statements. The statements are followed by two conclusions. Give answer

• Question No. 83

Statement: $H \leq R, Q < O \leq H \geq N \geq J, R \leq I \geq C < Z$

Conclusion: I. $J \geq C$ II. $O > C$

Options :

1. If only conclusion II is true.
2. If either conclusion I or II is true.
3. If neither conclusion I nor II is true.
4. If only conclusion I is true.
5. If both conclusions I and II are true.

Answer : If neither conclusion I nor II is true.

Direction:

In these questions, a relationship between different elements is shown in the statements. The statements are followed by two conclusions. Give answer

• Question No. 84

Statement: $C \leq D \leq N < R, X < Y \leq C, W > D \leq Y < H$

Conclusion: I. $N \geq Y$ II. $H > X$

Options :

1. If only conclusion II is true.
2. If only conclusion I is true.
3. If neither conclusion I nor II is true.
4. If either conclusion I or II is true.
5. If both conclusions I and II are true.

Answer : If both conclusions I and II are true.

Direction:

In these questions, a relationship between different elements is shown in the statements. The statements are followed by two conclusions. Give answer

- Question No. 85

Statement: $S \leq Y < D \leq E$, $L > X \geq A$, $A = W \geq S$

Conclusion: I. $L > S$ II. $A < E$

Options :

1. If only conclusion II is true.
2. If either conclusion I or II is true.
3. If neither conclusion I nor II is true.
4. If only conclusion I is true.
5. If both conclusions I and II are true.

Answer : If only conclusion I is true.

Direction:

Study the following sequence and answer the given questions.

L & N 4 8 A # V R 3 ! J 8 F * 9 Z I 6 E \$ @ H T 5 6 S ^ 1 % X 2 U

- Question No. 86

Which of the following element is 10th to the left of the one which is 21st from the left end of the given arrangement?

Options :

1. !
2. J
3. 3
4. ^
5. None of these

Answer : !

Direction:

Study the following sequence and answer the given questions.

L & N 4 8 A # V R 3 ! J 8 F * 9 Z I 6 E \$ @ H T 5 6 S ^ 1 % X 2 U

• Question No. 87

How many such symbols are there in the given series which are immediately preceded by a number and immediately followed by a consonant?

Options :

1. None
2. One
3. Two
4. Three
5. Four

Answer : Two

Direction:

Study the following sequence and answer the given questions.

L & N 4 8 A # V R 3 ! J 8 F * 9 Z I 6 E \$ @ H T 5 6 S ^ 1 % X 2 U

• Question No. 88

How many such number are there in the given series which are immediately preceded by number and immediately followed by symbol?

Options :

1. One
2. Two
3. Three
4. More than three
5. None of these

Answer : None of these

Direction:

Study the following sequence and answer the given questions.

L & N 4 8 A # V R 3 ! J 8 F * 9 Z I 6 E \$ @ H T 5 6 S ^ 1 % X 2 U

- Question No. 89

If all the digits are dropped from the series, which element will be tenth from the right end of the new arrangement?

Options :

1. &
2. @
3. \$
4. E
5. None of these

Answer : E

Direction:

Study the following sequence and answer the given questions.

L & N 4 8 A # V R 3 ! J 8 F * 9 Z I 6 E \$ @ H T 5 6 S ^ 1 % X 2 U

- Question No. 90

What should come in place of question mark (?) in the following series based on the above arrangement? LU

NX 81 ?

Options :

1. S#
2. L4
3. &4
4. #S
5. None of these

Answer : #S

Direction:

Study the following information to answer the given questions.

J, K, L, M, N, O, P and Q are sitting around a circular table but not necessarily in the same order. Some of the persons are facing the centre while some of them are not facing the centre.

NOTE: **Same direction** means that if one person is facing the centre then the other person is also facing the centre and similarly for facing the outward.

Opposite direction means that if one person is facing the centre then the other person is facing outward and similarly for vice versa.

K sits third to right of M and both are facing the opposite directions. The immediate neighbors of N face the same direction. There is only one person between M and Q. The immediate neighbour of M faces the opposite direction. L is not the immediate neighbour of either Q or M. O sits second to the right of N, who faces outward. Q sits opposite to O and both of them face opposite direction. J sits second to the right of P. The immediate neighbour of Q faces the same direction as L. J and Q face the same direction as L.

- Question No. 91

Who among the following faces the centre?

Options :

1. P

2. L
3. O
4. N
5. None of these

Answer : L

Direction:

Study the following information to answer the given questions.

J, K, L, M, N, O, P and Q are sitting around a circular table but not necessarily in the same order. Some of the persons are facing the centre while some of them are not facing the centre.

NOTE: **Same direction** means that if one person is facing the centre then the other person is also facing the centre and similarly for facing the outward.

Opposite direction means that if one person is facing the centre then the other person is facing outward and similarly for vice versa.

K sits third to right of M and both are facing the opposite directions. The immediate neighbors of N face the same direction. There is only one person between M and Q. The immediate neighbour of M faces the opposite direction. L is not the immediate neighbour of either Q or M. O sits second to the right of N, who faces outward. Q sits opposite to O and both of them face opposite direction. J sits second to the right of P. The immediate neighbour of Q faces the same direction as L. J and Q face the same direction as L.

- Question No. 92

Who among the following are immediate neighbours of K?

Options :

1. N, Q
2. M, Q
3. O, L
4. M, P
5. None of these

Answer : N, Q

Direction:

Study the following information to answer the given questions.

J, K, L, M, N, O, P and Q are sitting around a circular table but not necessarily in the same order. Some of the persons are facing the centre while some of them are not facing the centre.

Q sits opposite to O and both of them face opposite direction. J sits second to the right of P. The immediate neighbour of Q faces the same direction as L. J and Q face the same direction as L.

- Question No. 95

Who among the following is on the immediate right of M?

Options :

1. N
2. K
3. J
4. P
5. None of these

Answer : J

Direction:

Study the following information carefully to answer the given questions:

There are seven persons i.e. P, Q, R, S, T, U and V who lives in a building having three floors such that ground floor is numbered as 1 and above it is 2 and so on up to top floor numbered as 3. Each of the floor consist of 3 flats as flat-1, flat-2 and flat-3. Flat-1 of floor-2 is immediately above flat-1 of floor-1 and immediately below flat-1 of floor-3 and in the same way flat-2 of floor-2 is immediately above flat-2 of floor-1 and immediately below flat-2 of floor-3 and so on. Flat-2 is in east of flat-1 and flat-3 is in east of flat-2. Not less than two person lives on the same floor. Only one person lives in a flat. Two flats are vacant. Only one floor is between U and V but both live in same flat number. S lives immediately west to V. T lives immediately above R. No one lives on the east of U. R does not lives in the same flat number as S. T and S do not live on the same floor. P does not live in the same flat number as R. Q lives below the floor on which P lives but not in the same flat number. Q lives in an even numbered flat and on even numbered floor but not on the same floor on which R lives.

- Question No. 96

Who among the following lives immediately above Q?

Options :

1. P
2. S
3. V
4. U
5. None of these

Answer : U

Direction:

Study the following information carefully to answer the given questions:

There are seven persons i.e. P, Q, R, S, T, U and V who lives in a building having three floors such that ground floor is numbered as 1 and above it is 2 and so on up to top floor numbered as 3. Each of the floor consist of 3 flats as flat-1, flat-2 and flat-3.
